

SDG–11 : Sustainable Cities and Communities

Introduction

United Nations Sustainable Development Goal 11 (SDG–11) aims to make cities and human settlements inclusive, safe, resilient, and sustainable. It focuses on environmental sustainability, proper waste management, water conservation, green infrastructure, and creating healthy living environments for society.

Commitment of the University toward SDG–11

Khwaja Moinuddin Chishti Language University is committed to promoting sustainable development through environmental protection initiatives, cleanliness campaigns, water conservation facilities, and sustainable campus management practices. The University continuously works toward creating a clean, green, and eco-friendly campus environment.

Swachhta Hi Seva Abhiyan 2025

On 19 September 2025, the University organized a Human Chain Formation Programme under the “Swachhta Hi Seva Abhiyan 2025.” The programme aimed to spread awareness about cleanliness and hygiene among students, teachers, and staff members.

The event was conducted under the patronage of the Vice-Chancellor, Prof. Ajay Taneja, and coordinated by Dr. Nalini Mishra in the presence of Registrar Dr. Mahesh Kumar and faculty members. The programme emphasized the importance of cleanliness, public responsibility, and community participation in building a healthy society.

Campus Cleanliness Drive

The University regularly organizes Campus Cleanliness Drives to maintain a sustainable and healthy environment. Faculty members, staff, and students actively participate in cleaning activities across the campus.

Major Activities Conducted

- Cleaning of pathways and open spaces
- Proper collection and disposal of waste materials
- Maintenance of green surroundings

- Promotion of environmental awareness among students

These initiatives reflect the University's dedication toward sustainable community development and environmental responsibility.

Water Conservation Initiatives

The University has developed various facilities to ensure sustainable water management and conservation practices within the campus.

Overhead Water Reservoir

The overhead reservoir system is used for storing and distributing water efficiently across the University campus to meet daily consumption needs.

Drinking Water Purifier Systems

Water purifier systems have been installed at different locations in the campus to provide safe and clean drinking water to students, staff, and visitors.

Rainwater Harvesting System

The University has established underground rainwater harvesting tanks for collecting and storing rainwater. This initiative supports sustainable water management and helps in conserving water resources.

Borewell Water Recharge System

Borewell recharge systems have been constructed at various locations within the campus, including near the Administrative Building, to replenish groundwater levels and promote long-term water sustainability.

Liquid Waste Management System

The University has implemented a sewage treatment facility for effective liquid waste management. The sewage treatment plant ensures proper treatment and disposal of wastewater, contributing to environmental protection and campus hygiene.

Conclusion

Through cleanliness drives, water conservation measures, rainwater harvesting systems, borewell recharge facilities, and waste management practices, Khwaja Moinuddin Chishti Language University actively contributes toward the achievement of SDG-11: Sustainable

Cities and Communities. The University remains committed to building a sustainable, healthy, and environmentally responsible campus for future generations.
