**NATIONAL SEMINAR  
ON**

**“Climate Change, Environment  
& Sustainable Development”**

**24<sup>th</sup> -25<sup>th</sup> August 2022**

**Jointly Organized by**

**Department of Geography  
&  
Department of Economics**

**KMC Language University  
(U.P. State Govt. University)  
Lucknow**

## About the Organizer

The KMC Language University, Lucknow was established in 2009. KMCLU is located in Sitapur-Hardoi Bypass road, near IIM Lucknow. The Department of Geography started to offer Undergraduate (B.A.) and Postgraduate course (M.A.) from 2013. Later in the year 2018, the department started the B.Sc. (H) in Geography program. Since then the research activities were incepted that enabled the Department to start the Doctoral research work from 2019. The Dept. of Economics offers B.A. (H) course from 2013 and started M.A. in Economics from 2021.

## Theme of the Seminar

India is the 5th most vulnerable Country to climate change globally. For many, a warming climatic system is expected to impact the availability of basic necessities like freshwater, food security, and energy, while efforts to redress climate change, both through adaptation and mitigation, will similarly inform and shape the global development agenda. The links between climate change and sustainable development are strong. Poor and developing countries will be among those most adversely affected and least able to cope with the anticipated shocks to their social, economic and natural systems. The world's poor are especially prone to natural disasters given the fact that in many cases their livelihoods are directly dependent on natural resources. The Internet and other digital technologies can pose challenges to the environment but they can also be leveraged to advance environmental sustainability. The theme of the seminar is dedicated to the ongoing celebration of "**Azadi ka Amrit Mahotsav**" by the government of India as it is centrally concerned with the wellbeing of mankind and nature in broader perspective.

## Sub-Themes

- Climate Change and Future Earth
- Concept of Self-reliant India and Sustainable Development .
- Climate Change and Sustainable Agriculture & Water Resource.
- Climate Change & Global Warming , Disaster Management.
- Environment Challenges & Sustainable Development.
- Renewable Energy, Social and Rural Sustainability, Green Energy, Green technology, Waste Product Energy, Green Economy.
- Impact of Socio-Economic-Technological Sustainability.
- Global Warming, Green Agriculture, Sustainable Forestry Agriculture Diversification & Self Reliant.
- Urban Heat Island & LST.
- Modern Trends in the Biodiversity.
- Biotic & Biotic Stress Management, Weather Forecasting.
- Natural Resource Management & Conservation.
- Application of Geoinformatics in Agriculture, Ecology, Natural Resource and Environmental Management.
- Regional Planning & Sustainable Development.
- Big Data, Open Data and Future Earth.
- Earth System Governance and Sustainability.
- Sustainable Education and Future Earth.
- Future Earth Initiatives and Challenges.
